

Core Java Assessment Test

- Write a program to demonstrate the CRUD operation.
- Prepare demonstration of GUI based crud operations with java's swing.
- First prepare GUI as shown in below image using swing.

My Swing Example

ID

FIRST NAME

LAST NAME

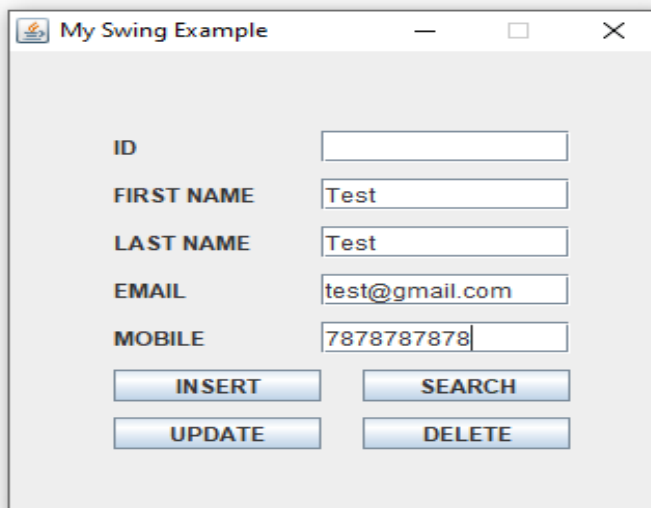

EMAIL

MOBILE

INSERT SEARCH

UPDATE DELETE

- Create student table accordingly in MySQL
- Id must be primary key and auto increment.
- When user fill the fname, lname, email & mobile and then if press insert button then data should be stored in student table.

My Swing Example

ID

FIRST NAME

LAST NAME

EMAIL

MOBILE

INSERT SEARCH

UPDATE DELETE

- Same as insert, if user give id in textbox and then if press search button, respective data should be filled in textboxes.
- But if id not then proper error message shown in console that id not found.
- Update and delete operation also follows the same procedure to updating and deleting individual student data at a time.
